Date: \_\_\_\_\_

## Simulation: Prejudice

1. Sources of Prejudice- Give your own example of each source and explain.

Source	Example and Explain
Psychological	
Social	
Economic	
Culture	

2. Explain the *cycle of distrust*. If you are a minority members, how would you break the cycle? Give an example to explain your answer.

## Simulation: Conformity

1. Define *conformity*.

2. Use your own words to finish the following table:

Characteristic	Explain: how does this affect the degree of conformity?
Group Size	
Degree of Unanimity	
Nature of Task	
Similarity	
Attraction to Group	
Acceptance	
Culture	

Characteristics  
of the  
Situation

Characteristics of  
the Individual

3. Explain why the true participant in Asch's line-judging study was always one of the last people to express his opinion.

**Simulation: Attributions**

1. Define *attribution*.
  
  
  
  
  
  
  
  
  
  
2. Describe Harold Kelley's attribution theory and explain why consistency is important in Kelley's theory.
  
  
  
  
  
  
  
  
  
  
3. Compare fundamental attributional error and self serving bias. Give examples to explain your comparison.

**Experiment: Mere Exposure**

1. Explain what *foot-in-the-door phenomenon* is.
  
  
  
  
  
  
  
  
  
  
2. Click the experiment tab (blue), to complete the trials and write down your results.
